

VIVANCO

Motorised indoor security camera with motion tracking and SOS call button

SKU: VNINDOORCAM360C

Emergency video calls at the touch of a button and smart home monitoring

SMART AUTOMATIC MOTION TRACKING

The **Prime Sphere indoor security camera** dynamically monitors your indoor spaces thanks to **auto-tracking**: it detects movement and automatically adjusts the viewing angle to follow the moving subject. Through the Vivanco Smart app, you can control the camera and receive **real-time notifications** when motion or sound is detected, making it easier to monitor your home, children or pets even when you are away. Simply download the app, pair the camera and connect it to Wi-Fi. The included cable and power adapter allow you to conveniently connect the camera to a power outlet.

Through the Vivanco Smart app, you can set a sound detection threshold. When this level is exceeded, the camera will send a notification to your smartphone through the app. You can also choose to receive motion detection notifications only when a person is detected, excluding other types of movement such as pets or objects.

SOS CALL BUTTON AND TWO-WAY AUDIO

The **two-way audio** function lets you listen and talk through the camera using the app, while the **SOS call button** allows anyone at home to start an emergency call with a single touch. When the button on the camera is pressed, people connected to the app are automatically contacted via video call.

HIGH-DEFINITION VIDEO AND NIGHT VISION

The **4 MP resolution** delivers detailed, high-resolution images both during the day and at night. Thanks to **infrared night vision**, you can continue monitoring your home even in the dark. The motorised movement provides a horizontal viewing range of up to **355°** and vertical rotation of up to **180°**, allowing the camera to cover a wide area of the room.

CREATE YOUR CONNECTED SMART HOME

Prime Sphere is also compatible with **Amazon Alexa and Google Home**, allowing it to integrate into your smart home ecosystem and be conveniently managed using voice commands. The **microSD card slot** supports local recording and can be used as an alternative or in addition to the optional storage services available through Vivanco Smart. The camera records continuously, giving you a 24/7 view of your home and complete monitoring even when you are away.

KEY FEATURES

- SOS call button

- Compatible with Alexa and Google Home
- Infrared night vision
- Automatic motion tracking and motion and person detection
- High-definition 4 MP video
- Motion detection
- Compatible with 2.4 and 5 GHz Wi-Fi networks
- Vivanco Smart app control and real-time notifications
- 355° horizontal rotation
- 180° vertical rotation
- Two-way audio
- Local recording on microSD

WHAT'S IN THE BOX

- 1 Prime Sphere
- 1 USB-A/USB-C cable
- 1 power adapter
- 1 mounting bracket
- 1 set of screws
- 1 user manual
