

VIVANCO

360° outdoor camera with remotely installable solar panel

SKU: VNOUTSOL360EFLEX

Adjustable solar panel for greater installation flexibility

MAKE THE MOST OF SUNLIGHT EXPOSURE

The **Solar Link outdoor camera** features a **6000 mAh battery** and an **external 3W solar panel** that can recharge the camera in approximately 8 hours. The panel can be installed in a different position from the camera, allowing you to choose a location with better sunlight exposure while maintaining the wired connection. The battery can also be recharged via USB-A/USB-C cable.

MOTION TRACKING AND 360° CAMERA

Solar Link combines **motion detection** and a **PIR sensor** to detect human presence and generate more targeted alerts. The camera automatically follows moving subjects and provides a panoramic view of up to **265°** and vertical movement of up to **100°**. By connecting it to Wi-Fi, you can monitor outdoor areas from your smartphone and receive real-time notifications about detected events. Simply pair the camera with the Vivanco Smart app to stay updated at all times.

HIGH-DEFINITION IMAGES AND RECORDING OPTIONS

The **4MP video resolution** delivers detailed, sharp images for clear monitoring of your outdoor areas. The microSD slot lets you add a memory card for local recordings. As an alternative or in addition to microSD storage, you can choose one of the Vivanco Smart storage subscription plans. The camera automatically starts recording when motion is detected, helping optimise both memory usage and battery life.

NIGHT VISION

Night mode can be changed manually or set automatically to **infrared vision up to 15 metres** or **colour night vision**. Simply access the app to select your preferred mode.

BUILT-IN OUTDOOR SIREN

The camera adds an extra layer of protection thanks to two-way audio: you can hear what is happening, receive alerts related to sound detection and also speak through the camera. You can also activate the built-in siren to raise an alert when suspicious movement is detected.

IDEAL FOR OUTDOOR AREAS

The **IP65 rating** protects the camera against water and dust, making it resistant to rain and snow. It is also designed to operate in temperatures from **-10 °C to +45 °C**, making it a practical solution for protecting outdoor areas in different seasons and climates.

INTEGRATE SOLAR LINK INTO YOUR SMART HOME

Solar Link is compatible with **Amazon Alexa and Google Home**, allowing you to integrate it into your smart home and further personalise its functions using voice commands.

KEY FEATURES

- PIR sensor for human detection
- Infrared night vision up to 15 m and colour night vision
- Compatible with Amazon Alexa and Google Assistant
- Separate 3W solar panel for remote installation
- Built-in 6000 mAh battery
- Automatic motion tracking
- IP65 protection against water and dust
- Built-in alarm siren
- 265° panoramic view and 100° vertical movement
- 4MP high-definition video
- 2.4 GHz and 5 GHz Wi-Fi connection
- Dimensions: 112 x 140 x 143 mm

WHAT'S IN THE BOX

- 1 Solar Link
- 1 solar panel bracket
- 1 USB-A/USB-C cable
- 2 bags of screws
- 1 user manual
